We welcome the opportunity to serve you and your endodontic needs. Your dentist has determined a need for endodontic treatment or evaluation. Our office specializes in providing this care to the most sensitive of patients, regardless of the complexity of treatment. Usually when treatment is needed, it can be completed in our office using local anesthesia in one or two visits. Temporary fillings are placed after each visit and upon completion of your treatment with us, you'll return to your dentist for the placement of a crown or other final restoration. We look forward to meeting you and working with you in the maintenance of your oral health.

Please visit our website at www.palosrootcanal.com for patient registration and additional information about our practice.
